## science, technology and knowledge

### Aims and objectives:

- To provide a means of connection between researchers interested in the sociology of science, technology and knowledge, and to encourage lively debate amongst members.
- To actively pursue opportunities to contribute to a critical understanding and use of science and technology and the regulation of science and technology.
- To meet initially once yearly at the annual TASA conference to share research and study interests; identify opportunities to connect with external groups and agencies; discuss current topical issues, and develop strategies that will enable communication within and promotion of the group.
- To support sociology graduates and to develop an agenda for career opportunities outside of academia.
- To provide a basis for streams on sociology of science, technology and knowledge at TASA conferences.
- To encourage postgraduate interest in the field of the sociology of science, technology and knowledge.

### Year established:

2008

### Convenor and contact details:

Claire Donovan  
Research Fellow  
College of Arts and Social Sciences  
Australian National University  
61 2 6125 2214
